Specifying Door Swing

Threshold/Sill

Our high-performance sills sit slightly higher, keeping moisture out. Unlike plastic and composite-based sills, our sills are made with a solid piece of cold oil-treated hardwood that will not expand or contract during changes in temperature, preventing leaks from occurring at the juncture of the sill and jamb.

Clear LE (Low-E)

When you want the view and nothing but the view, Clear Low-E Glass is your answer. It is an option that works equally well from your entry door to your patio door. Offered in standard 6/8 and 8/0 door sizes, the wide range of options for your doors, sidelights, and transoms means choices that fit your home.

View our price catalog for available options.

Clear LE GBG (Grilles Between Glass)

A white grille between glass featuring clear Low-E coating is an elegant, energy-efficient window design.

The white grille's color provides a neutral tone that complements a variety of architectural styles, from traditional to contemporary, and its maintenance-free design means that it will retain its crisp, clean look without the need for repainting.

View our price catalog for available options.

Clear LE External Grilles

External grids with clear low-E glass offer a customizable and energy-efficient option for windows. The grids are mounted on the exterior surface of the glass, allowing for easy customization to match any architectural style or homeowner's personal taste.

View our price catalog for available options.

Clear LE SDL (Simulated Divided Lites)

Get the authentic look of a divided wood door without sacrificing energy efficiency.

Features internal gray spacers and external grids for a realistic appearance.

View our price catalog for available options.

Raise-and-Lower Blinds

Blinds enclosed between glass gives you privacy and light control without dangling cords and endless dusting.

Clear Beveled SDL - \$\$\$\$

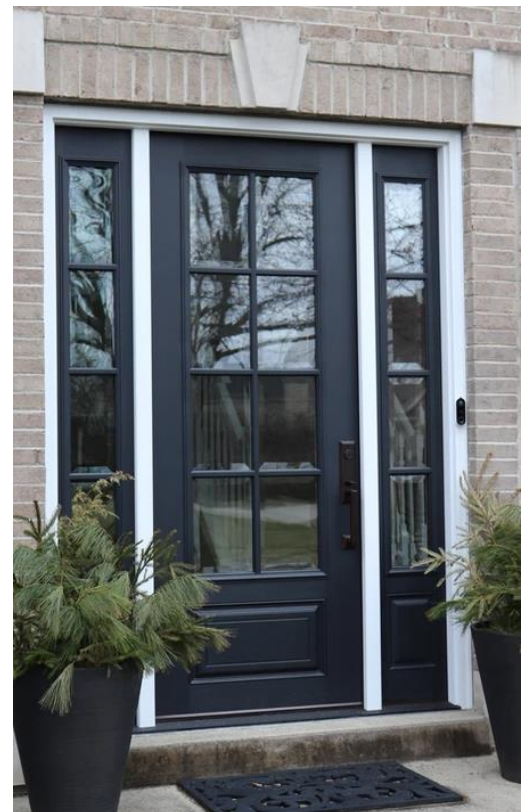

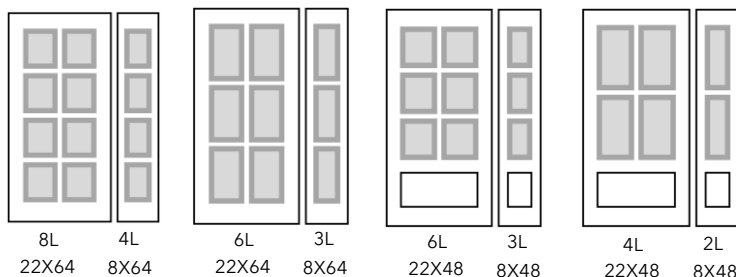

Our clear beveled door glass is an innovative offering for fiberglass doors, traditionally only available for wood doors. When paired with a mahogany-grained fiberglass door, this glass mimics the classic appearance of a true divided lite, providing the same elegant and segmented look. The beveled edges of the glass catch light in a way that adds depth and sparkle, enhancing the rich texture of the mahogany finish. This combination brings the timeless beauty of classic design to the durability and energy efficiency of modern fiberglass doors.

Available in the following:

6/8

SDLA - \$\$\$

SDL(Simulated Divided Lites) are grid systems that come in a wide variety of lite patterns. Please view our price book to see which options are available in each SDL category. The Masonite patterns below do not come with internal grids and are only applied with an adhesive external grid.
